-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

1. Claims 1-14 are pending.
2. A telephonic conversation with Attorney at Law, Charles L. Leeck on 10/03/05 requesting Election between one of the two following Election/Restrictions groups was made and indicated he will respond to the request in a couple days following an attorney-client communication. Attorney at Law Charles L. Leeck responded on 10/24/05 by telephone and requested the submission of the restriction requirement.

### ***Election/Restrictions***

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8 and 14 drawn to a transgenic mouse which displays a reduced heart rate as compared to a negative transgenic offspring mouse, classified in class 800, subclass 18.
  - II. Claims 9-13, drawn to a recombinant nucleic acid molecule, classified in class 424, subclass 93.1.
4. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the transgenic mouse as claimed can be used in materially different processes such as identifying compounds for treatment of cardiac diseases.

Furthermore, inventions of groups I and II are patentably distinct because they are drawn to compositions that have distinct structure, function, mode of action and utilities. For example, the invention of group I is drawn to a transgenic mouse which has distinct and different structure and function compared to the invention of group II which is a recombinant nucleic acid molecule. Additionally, utilities of a transgenic mouse are distinct and different from those of a recombinant nucleic acid molecule, which are directed to different class and subclass.

5. Because these inventions are distinct for the reasons given above, have acquired a separate status in the art shown by their different classification and their recognized divergent subject matter, and because each invention requires a separate, non-coextensive search, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply is to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and the fee required under 37 CFR 1.17(i).
